

CARE (Career Awareness Related Experience):-

The goal of the program is to provide the youth, with the opportunity to develop future job skills, life skills and awareness of career paths through meaningful work experience and educational sessions.

One of the main objectives is to provide real-life experiences on-the job site so that trainees will gather valuable skills, making them more employable after the training period.

Under this program, students who have completed their studies and are facing problem finding jobs in working environments of their respective fields to gain work related experience. During such training they get monthly allowance (stipend), free lodging and boarding facility
